2. The Harbor:

25X1

The pier between the GETREIDEKAI (grain quay) and the SCHWIMMDOCK (floating dock) [REDACTED] is under repair. Diving operations were under way at the inner end of the pier. Concrete pillars have been poured all along the pier, but the deck has not yet been installed.

25X1

A floating dock was lying in the northeastern corner of the harbor; apparently, it was a concrete dock, with an estimated hoisting capacity of 5,000 - 6,000 tons. There was a 3,000-ton vessel in the dock. There is no floating dock at the spot marked SCHWIMMDOCK [REDACTED]

25X1

Grain loading in the harbor is undertaken at the south side of the GETREIDEKAI, which is equipped with 3 mobile grain "chutes".
